Article II Another chapter

SECTION II.1. A SECTION WITH SUB SECTIONS

- (a) SUBSECTION 1 The `enumsubsection` environment is used to indent subsections properly while continuing section numbering. By using the `item` command the title will appear in the text and in the TOC (provided that the `depth` is set such that it will show).
- (b) `item*` will cause the title to not appear in the text but will be in the TOC.
- (c) `itemnotoc` will not have a title and not appear in the TOC. It is also possible to have a subsub section using the `enumsubsubsection` environment
 - (i) Item 1
 - (ii) Item 2

SECTION II.2. A section doesn't need a name. If it doesn't have one, simply leave it blank.
